

4 second region and the third region, whereby the housing having a
5 fourth light source trained from above onto the third region and
6 having a significant proportion of radiation in the ultraviolet
7 range.

8
9
10 60. The apparatus according to claim 51 wherein the
11 housing has a cover hood which is arranged above the emplacement
12 surface and has at least one lateral opening for access to the
13 emplacement surface.

12 61. The apparatus according to claim 60 wherein the
13 third region is spaced from the opening.

1 62. The apparatus according to claim 51 wherein the
2 emplacement surface is equipped in a fourth region with an induc-
3 tive sensor. --.

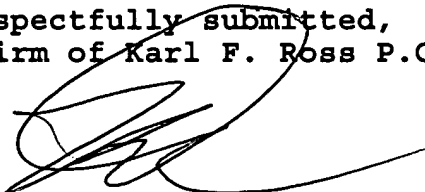

REMARKS:

The present communication replaces the Preliminary Amendment which was originally filed as an amendment which includes a clean version of replacement claims 32-62. Since a new set of claims has been provided in its entirety, neither a marked-up version nor a clean version of the amended claims is required.

The number of claims now in the case is identical to the number of claims covered by the fees tendered originally, namely

31, and thus no additional fees are required. The new claims are drafted in accordance with U.S. practice.

Respectfully submitted,
The Firm of Karl F. Ross P.C.
